AIRBOXNOW!

Corporate File Sharing Solution

CORPORATE DROP-BOX

InternetNow! The Internet Specialists

Why Share ?

- **Fast internet lines** and **Wifi** availability makes sharing documents/files/object a necessity for today's fast moving corporates

- **Shared folders** allow corporate partners/branches/ vendors to work efficiently together

- **Updates** of catalogues, project files to selected partners and users can shared

Why Share ?

- In 2012, over 500 million devices are activated on Android alone. Apple's iPhone, iPads ?

- These people are bringing their devices to work.

Problem

Are you going to put your company data for sharing....

- Out in the public, password guessing anyone?

- Where you have no idea where and how it is stored?

Problem

Are you going to put your company data for sharing....

- Permission to access can be granted to anyone including personal email addresses?

- When consultation and issues arise, who do you call?

I.T Managers says **NO** to :

- yet another sign on, another login, another password

- lost devices, stolen tablets, notebooks: nightmare tracing what is shared and resetting user's rights

I.T Managers says **NO** to :

- everyone can act as Admin, without control for sharing? No corporate Access policies

- expensive renewals

- Support and consultation involves consulting Forums @!#!

Users have enough of...

- copying documents in USB, multiple copies everywhere

- emailing shared documents ..STOP!!

- time consuming tracing updates to particular documents

Users have enough of...

- not accessible with mobile apps

- using ancient FTP to do file transfer and upload and only works on certain locations

The Solution

Corporate File Sharing Solution

- Important documents are ALWAYS available ANYWHERE, to EVERYONE in the selected GROUP

- Shared FILES are SECURE, ENCRYPTED in storage of your choice or OWN SITE

- All CHANGES are VERSIONED and BACKUPED automatically

- Mobile NATIVE APPS such as ANDROID and IOS supported

- Works On ALL platforms, WINDOWS, MAC, LINUX
